

Comprehensive sheet metal fabrication using advanced technology for rapid prototyping and manufacturing. Specializing in stainless steel forming and welding. High quality and improved processing speeds are achieved by utilizing several of our highly or fully automated machines.

### Punching

- CNC Laser/Punching Cells: Salvagnini SL4 CNC Laser/Punch
- CNC Turret Presses: Amada CNC Turret Punch Press

### Laser Cutting

- CNC Laser Cutter: Salvagnini CNC Fiber Laser Systems

### Forming

- CNC Forming Cells: Salvagnini P4 CNC Panel Bender
- Press Brakes: including Amada, Accurpress, and Safan Darley. 25 to 100 Tons at 4' to 12' beds
- Safan Darley 35T Automated Mini-Cell

### Laser Welding

- Laser Welder: Lightweld Welding Systems

### Welding

- TIG Welders: Miller Syncrowave TIG Welders, Lincoln 275 Tig Welders, etc.
- Spot Welders: Various models including Future Industrial Machines, Amada, Lors Tecna, etc.
- Stud Shooting: Pro Weld, Betterman, Midwest Fasteners, etc.

### Grinding & Finishing

- Deburring/Surface Finishing Equipment: Various machines including Timesavers, and G&P Machinery, etc.

### Machining

- CNC Mill: HAAS CNC 3-Axis Vertical Mill
- CNC Lathe: Okuma Lathe
- Clausing Manual Mill
- Drill Presses: Clausing
- Manual Mills: Ex-Cell-O and Bridgeport
- Surface Grinder

### Miscellaneous

- Pem Setters: Pemsertter
- Saws: Various models including Amada, Grob, Bewo, etc.
- Rolls: Reed Metal Roll, Niagara Metal Roll
- Inspection Systems: Virtek Laser measuring system
- Storage & Retrieval System: Salvagnini Automatic Retrieval and Auto Store System

### Additionally

- Product Development & Prototyping with specific equipment listed.
